DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by McKee, U. S. Patent 4,240,543. McKee teaches a document display piece comprising an open hook 4 configured to receive a handle, knob, nail etc for hanging piece and a pocket for receiving a document 12. The pocket is integrally connected to the hook and comprising a unitary member forming a first planar wall 8 and a second planar wall 6. The first planar wall 8 and the second planar wall 6 being connected only at a U-shaped fold 10 along a bottom portion of the piece, wherein the hook is formed of a rigid material such that document is supported in the pocket without deforming the hook. The first planar wall 8 is formed co-planar with the hook and the second planar wall is substantially parallel with the first planar wall. The length of the second planar wall 6 is less than a length of the first planar wall to provide a space between an end of the second planar wall and the hook and wherein piece is formed of a transparent material such that the document can be viewed through the first planar wall and the second planar wall.
3. With respect to claim 17-19, the method limitation are consider inherent by the teaching of McKee.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 22-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKee. McKee discloses the claimed invention except for the specific size dimensions. It would have been obvious matter of design choice to construct the dimension of the document display piece taught by McKee of any suitable size and dimension, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Luciani et al., U. S. Design Patent 429,286 is cited to show parking permit holder.
